

## Webstorm WAN

ADSL with Static IP

In contrast to the expensive Diginet Solutions used to deploy a secure Wide Area Network, Webstorm now offers a MPLS WAN with static IP's over ADSL. The Reliability, management and security together with a 1:1 contention ratio rivals that of the conventional Diginet but at a fraction of the cost.

# Webstorm

NEW Product Announcement:

**Wan for Data**

**WAN for Voice**

**WAN for Video**

**NBI : For technical reasons, these are separate products and should not be combined**

**Name:** **ADSL WAN with Static IP**

**Main Features:** ADSL speeds up to 4Mbps. (512Kbps upload)  
Webstorm secure Realm. (does not require VPN, IPSec overhead.)  
1:1 Contention Ratio (normal ADSL is 50:1 contention ratio)  
Static Private IP.  
Local Only bandwidth. (R25 per GB)  
No special hardware required. (Use normal ADSL Routers)  
Ideal for VoIP, Server access, IP Camera remote surveillance, file sharing, gaming, point of sale etc.

**Optional:**

- Internet option available. (normal ADSL CAPS prices apply)
- VoIP routing option available via Webstorm

**Costs:**

**Wan (Wide Area Network – Nationally)**

<b>Setup:</b>	<b>Nil</b>
<b>WAN Realm (less than 5 branches)</b>	<b>NIL</b>
<b>Access to WAN &amp; ADSL Data:</b>	<b>R299 /Branch/month</b> (5 gig per branch)
<b>Additional Bandwidth</b>	<b>R25/GB</b>

**ADSL Line Rental**

Via Telkom, but can be arranged and billed via Webstorm  
Analogue portion and installation billed by Telkom directly to end user

**ADSL Line rental:**

4MBPS	R413.00/month
512KBPS	R326.00/month
384KBPS	R152.00/month

**VoIP Call Rates**

**\*Inter-Branch** **FREE**

**Brief description:**

This product allows for a MPLS layer on the SAIX ADSL network to construct a WAN in the same fashion as if branches were linked together by a Diginet (Leased Line). The network initially has no connection to the “outside” world and functions as a secure and private network with all the branches having its very own static private IP address. The savings achieved are numerous and can be summarized as follow:

Item	Diginet	Webstorm WAN
Price	R2800 pm (no internet incl.)	R712 pm (includes 5GB Wan traffic)
Upload	64Kbps	Up to 512Kbps
Download	64Kbps	4Mbps
Contention Ratio	1:1	1:1
Static IP	Yes	Yes
Special Routers	Yes (+- R7000 per branch)	No
Installation Cost	R 3500 per branch	R 404 per branch for Telkom Line
Contract	12 month	No Contract ( Month to Month)
Secure	Yes	Yes

Prices are launch specials and are subject to change.

**Prices includes VAT.**
