

Webstorm's SiteBuilder Create your own website in minutes

Webstorm's SiteBuilder is a website publishing tool that allows you to create and manage your personal or business website with ease. SiteBuilder's intuitive wizard-style interface allows anyone to build a professional website in 7 easy steps – no design skills or HTML experience necessary! Your completed site is immediately available and can be edited afterwards.

Our SiteBuilder has a list of benefits that makes designing your website fast, easy and enjoyable

- **Spoilt for choice:** choose from 200 professionally designed templates as well as an impressive variety of colour and font schemes to give your site personality.
- **It's so simple:** follow the 7 easy steps, adding your own photographs, logo and text, to create a fully-functional website in minutes. Click on the help icon at any stage to have your questions answered.
- **Fast & friendly:** you build your site in real time. Simply open the SiteBuilder wizard in your konsoleH control panel and begin editing...it takes minutes to edit entire pages or update anything on your website.
- **It's affordable:** all our web hosting packages include SiteBuilder Lite for free. If you're looking for a more comprehensive solution, then SiteBuilder Standard, at only R100.00 per month, offers unlimited pages and numerous interactive features including a blog and photo gallery.

How do I get Webstorm's SiteBuilder?

- **New customers:** SiteBuilder Lite is included with all our Web Hosting plans. However, if you'd like to benefit from an unlimited number of website pages, even more template choices, a forum, blog and photo gallery, simply select the SiteBuilder Standard for as little as R 100.00 per month. To activate your SiteBuilder package, log onto the konsolEH control panel and enable your SiteBuilder.
- **Existing customers:** Log into your konsolEH control panel (you are welcome to ask our support desk to help you with the access details) and click on the SiteBuilder tool to activate your SiteBuilder package. Once you've enabled your SiteBuilder, you can elect to use the SiteBuilder Lite or Contact our sales team to activate the Standard package.

* **Note:** to use the SiteBuilder wizard you will need to have **Internet Explorer 6.0 and higher** or **Firefox 1.0 and higher**

Webstorm's SiteBuilder Terms and Conditions:

- Using SiteBuilder will overwrite your existing website. It is important to ensure that you have a backup of your existing site before creating a new site.
- Webstorm's SiteBuilder is integrated into existing hosting packages and relies on specialised server software. Should you decide to host elsewhere, it will not be possible to transfer your SiteBuilder-created website.
- Should you decide to terminate your SiteBuilder package, your SiteBuilder account will be removed from our database and your SiteBuilder website will be inaccessible to you. You will also lose features and functionalities of the site. Please ensure that you have a separate backup of the images and content used on your SiteBuilder website.
- Webstorm's SiteBuilder is not available on Multiple Domains.
- We do ensure that backup procedures are in place for all websites created by our SiteBuilder tool. However, it is important to note that it is not possible for Webstorm to do a backup restore of an individual website. The SiteBuilder tool has 'undo' functions which enables you to revoke changes in each step of the process. In addition, your changes need to be confirmed by you before proceeding. These steps should ensure that customers are conscious of their changes and are making an informed decision throughout the process.
